## Job Description

### I. POSITION:

Golf Course Spray Technician

### II. RELATED TITLES:

None

### III. JOB SUMMARY (Essential Functions):

The spray technician under the supervision of the golf course superintendent performs chemical applications on the golf course and fertilizes tees, greens, fairways and rough. The spray technician is responsible for reading and understanding the label of any chemical or fertilizer applied. Must know where to find Material Safety Data Sheets (MSDS) on the computer. This position is also responsible for compiling reports of pesticide usage on the golf course and may be required to submit monthly use reports to Sacramento County. The Spray Technician must obtain and keep current a QAL or QAC with the State of California.

### IV. JOB TASKS (Additional Responsibilities):

- 1) Performs routine safety inspections on all spray equipment
- 2) Must read all pesticide labels before use and apply all chemical within label recommendations.
- 3) Maintains chemical storage and mixing areas in compliance with county, state, and federal regulations and is responsible for the safety and direction of all chemical handlers and/or helpers.
- 4) Must complete training requirements as demanded by the county, state, and federal governments.
- 5) Must have a yearly fit test for approved use of a respirator.
- 6) Must have a complete knowledge of chemical application equipment
- 7) Must know the proper techniques of sprayer calibration.
- 8) Must know the proper techniques of calibrating fertilizer spreaders—large and small
- 9) Must have the ability to follow oral and written directions
- 10) Must have possession of a valid driver's license

### V. REPORTS TO:

Golf Course Superintendent

### VI. SUPERVISES:

None

### VII. PHYSICAL REQUIREMENTS

Must be able to sit, stand, walk, kneel, bend and lift 50 pounds
