Category Changes for QAL/QAC Holders

Beginning January 1, 2024, the Qualified Applicator License/Certificate (QAL/QAC) subcategories listed will be eliminated and ineligible for renewal.

- Subcategory L – Wood Preservation
- Subcategory M – Anti-Fouling Tributyltin
- Subcategory N – Sewer Line Root Control
- Subcategory O – Field Fumigation
- Subcategory P – Microbial Pest Control

If you hold one or more of these subcategories, review the [QAL/QAC Subcategory Holders Renewal Information document](#).

There are two new certification categories for Soil Fumigation (Category L) and Non-Soil Fumigation (Category M). If you use pesticide(s) labeled as a fumigant, review the [Qualified Applicator License/Certificate Fumigation Categories document](#). The applications and examinations to obtain these new categories are available now!

Timeline of Category Changes

The examinations for the new Soil Fumigation (Category L) and Non-Soil Fumigation (Category M) categories are available at DPR's computer-based testing centers now! The study manuals for the new fumigation categories will be available July 2023. Visit DPR's [Certification and Training webpage](#) for information.

If impacted by the new regulatory requirements, DPR encourages you to obtain compliance between July – December 31, 2023. Obtaining compliance prior to January 1, 2024 will allow you to continue conducting your current pest control activities uninterrupted in 2024.

III 2024.

On January 1, 2024, the Certification and Training regulatory requirements are effective and the existing subcategories that are listed above are eliminated and ineligible for renewal.

Additional information on the Certification and Training regulatory changes that are effective January 1, 2024 can be found on DPR's [Certification and Training webpage](#). Scan the QR code to visit the webpage or click the link.

Who We Are

The California Department of Pesticide Regulation protects human health and the environment by fostering safer and sustainable pest management practices and operating a robust regulatory system to monitor and manage the sale and use of pesticides across the state. DPR's work includes registering all pesticides sold or used in California, conducting scientific evaluation of pesticides to assess and mitigate potential harm to human health or the environment, investing in innovative research to encourage the development and adoption of integrated pest management tools and practices, monitoring for pesticides in the air and water, conducting outreach to ensure pesticide workers, farmworkers and local communities have access to safety information, and enforcing pesticide regulations in coordination with 55 County Agricultural Commissioners and their 400 field inspectors.
